

EASY REPLACEMENT VENT, 5"x14"

FOUNDATION • SUBFLOOR • SOFFIT • GARAGE

EZRvent FV100

3 easy installation steps:

1. Remove old screen, leaving old vent frame in place
2. Push EZRvent into old vent opening
3. Secure using one 2-1/2" screw on each end

- Easy to Install
- Higher Grade
- Retrofit
- New Construction

EZRvent FV100 is an easy to install replacement vent 5" x 14" foundation, sub-floor, soffit and garage vents. Our FV100 is made of a durable UV protected plastic and heavy gauge galvanized, stainless, or copper screen that will last for years.

Installation is easy and saves labor time! Simply remove the old vent screen, push the new EZRvent in place, and install one 2-1/2" screw at each end of the vent. It's as easy as that!

Existing stucco and siding remains intact.

Although designed as a replacement / retrofit vent to keep the critters out, the EZRvent FV100 can be used in new construction for a higher grade finished look than standard new construction vents. With their unique picture frame shadow box styling and recessed screens, EZRvents are a perfect complement to vinyl clad windows and doors.

**FITS ROUGH OPENING
SIZE: 5" x 14"**

(4-1/2" x 13" MIN TO 6" x 14-1/2" MAX)
